

Agroecological crops for families in the Central American Dry Corridor

NICARAGUA / HONDURAS / EL SALVADOR

 Webstory

The technological solution

Solutions to food security and sovereignty problems through the use of harvesting and water use technologies, validation of drought-resistant varieties and the establishment of community seed banks.

Description

It consists of the implementation of organic farming plots focused on self-consumption and mini-marketing, with low water consumption, using open-pollinated seeds and few organic fertilizers.

Results

- Biointensive orchards have been established combined with efficient irrigation and water harvesting technologies.
- The availability and exchange of seeds has been improved.
- The method has been disseminated through regional workshops, internships, training centers, international forums, which have allowed the method to scale to new levels in Central America.
